

# LIFE CYCLE OF A PLANT

# LIFE CYCLE OF A PLANT

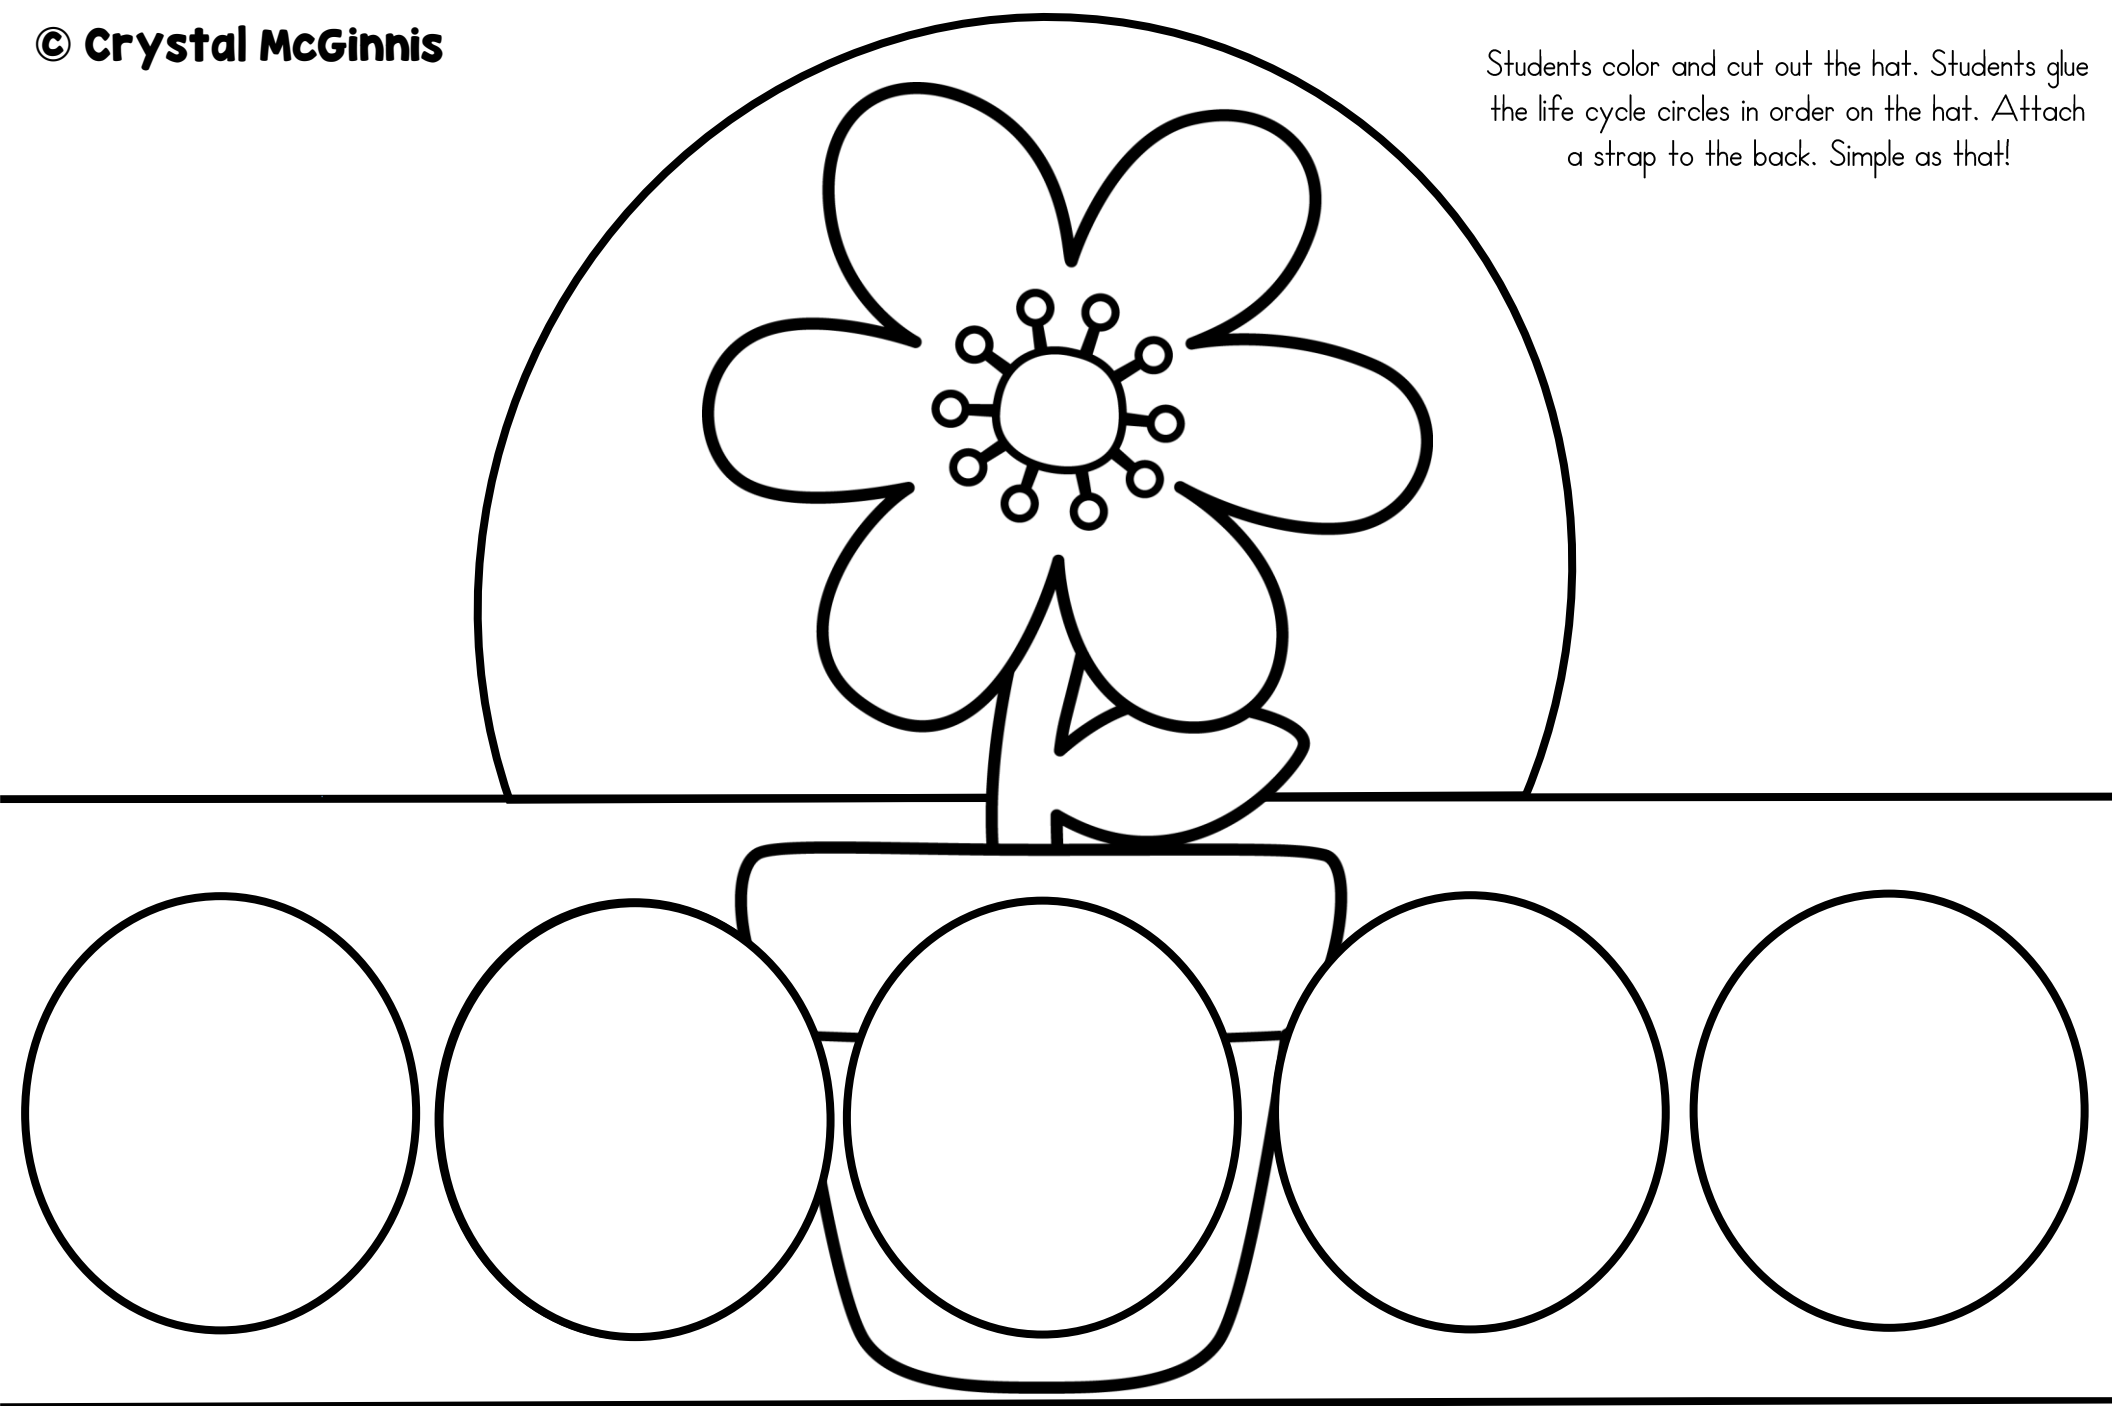

Students  
sequence  
the life  
cycle on  
the hat.

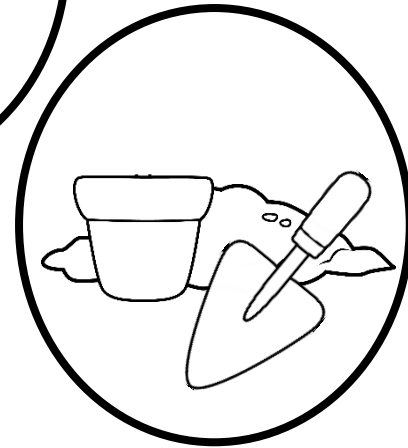

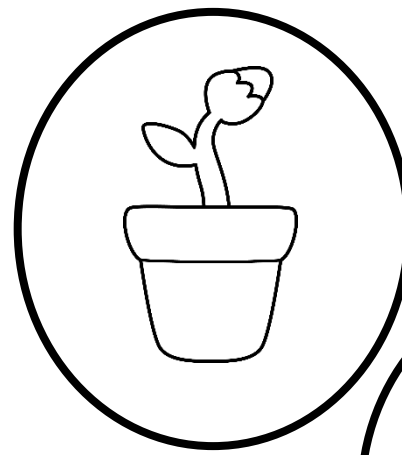

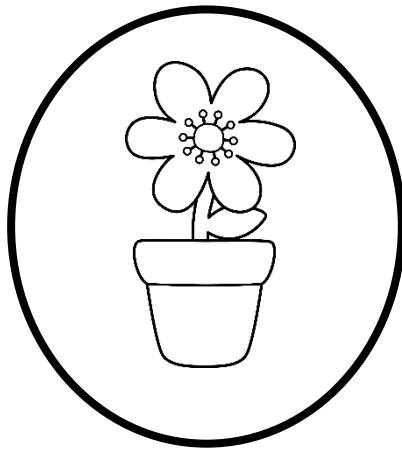

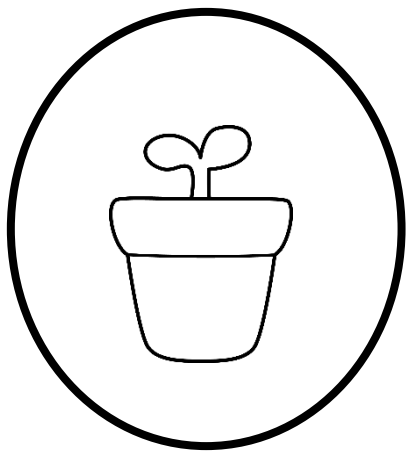

# LIFE CYCLE OF A PLANT

Students  
sequence  
the life  
cycle on  
the hat.

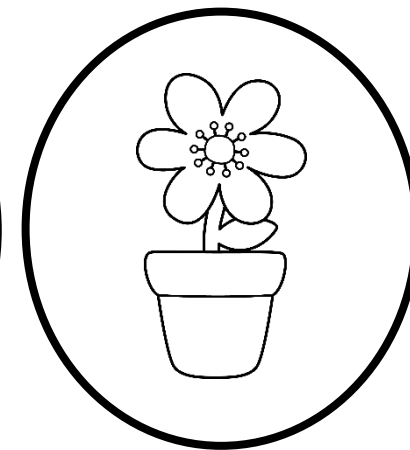

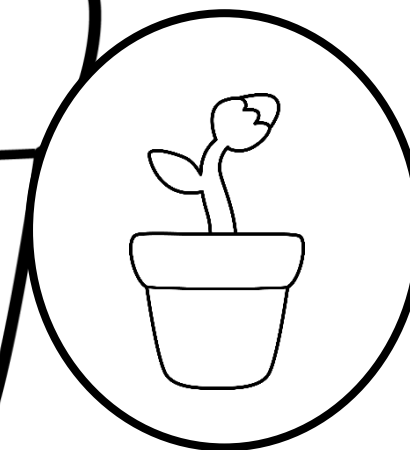

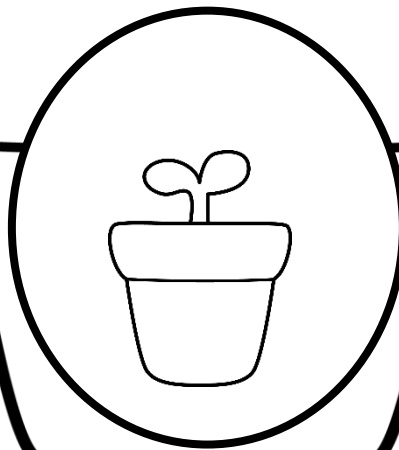

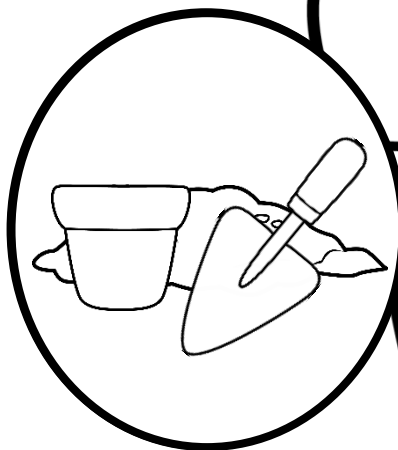

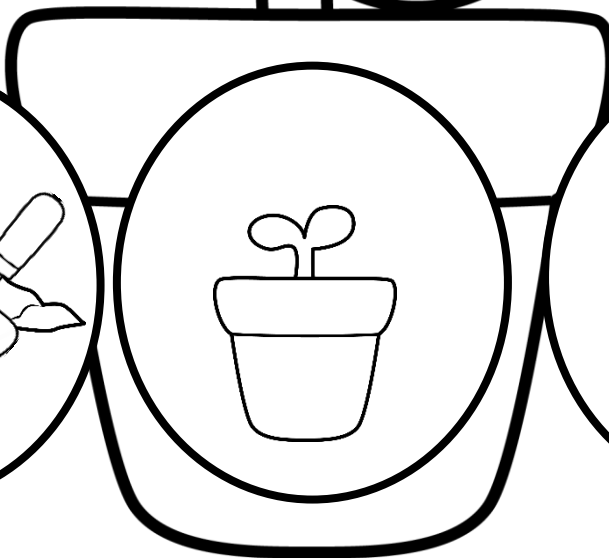

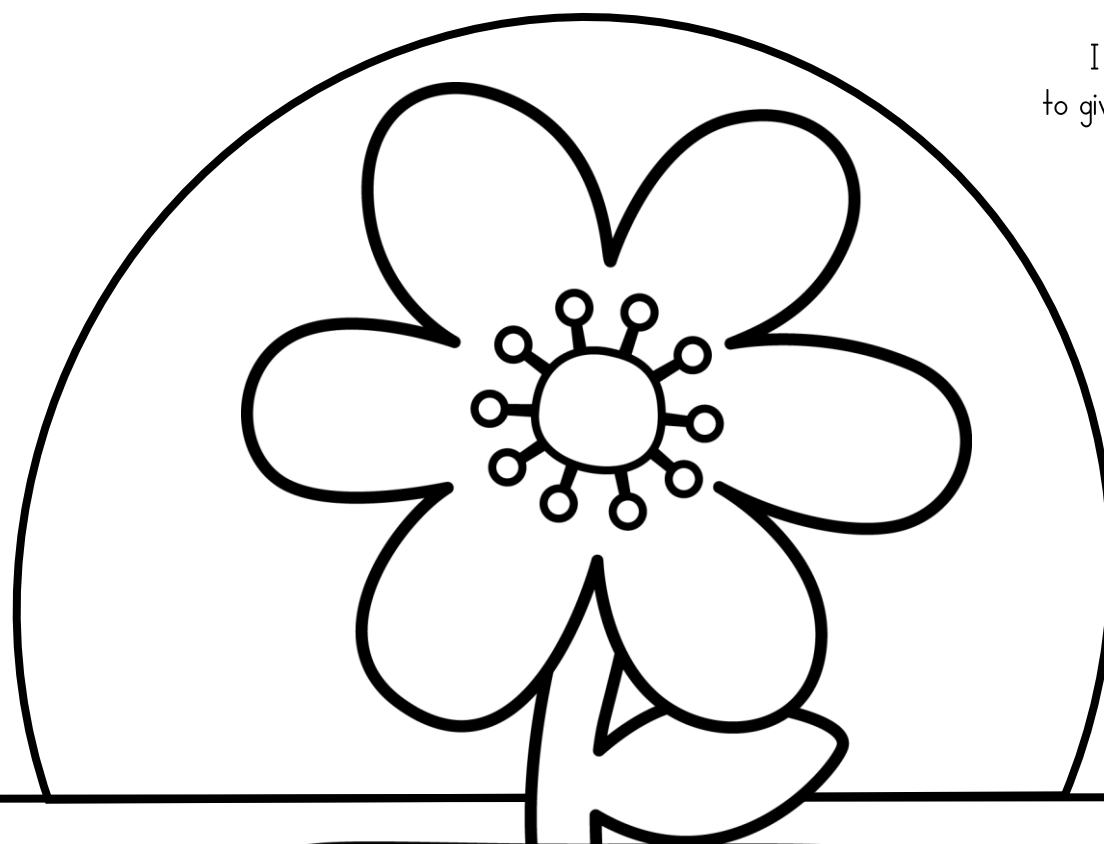

Students color and cut out the hat. Students glue the life cycle circles in order on the hat. Attach a strap to the back. Simple as that!

Cut out the band to attach to the back of the hat. You may need to add extra construction paper for students with larger heads. Students cut out the life cycle circles, sequence them, and glue them on the life cycle hat.

I have provided this version of the hat  
to give to my students who are not ready for  
cutting.

# LIFE CYCLE HAT BUNDLE
